OBJECTIVE

Computer Science and Engineering graduate with hands-on experience in **Python, SQL, Pandas, NumPy, Excel, and Power BI**. Skilled in **data cleaning, EDA, visualization, and extracting actionable insights**. Seeking an entry-level **Data Analyst** role to apply analytical and problem-solving skills to support data-driven decisions.

SKILLS

Technical Skills:

- **Programming:** Python, SQL
- **Data Analysis:** Pandas, NumPy, Exploratory Data Analysis (EDA)
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **Data Cleaning:** Data Cleaning, Data Transformation, Data Validation
- **Database:** MySQL
- **Microsoft Excel:** Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting
- **Core Concepts:** Data Structures and Algorithms (DSA)
- **Tools:** Git, GitHub, Jupyter Notebook

EDUCATION

Buddha Institute of Technology

Bachelor of Technology in Computer Science and Engineering (AIML)

CGPA: 7.96

Division Awarded: I-DIV WITH HONS

2022 – 2026

Gorakhpur, UP, India

TRAINING

Data Analyst Trainee — QSpiders, Noida

April 2026 – Present

- Developing hands-on skills in **Python, SQL, Excel, Power BI, Pandas, and NumPy** through practical projects.
- Practicing **data cleaning, EDA, visualization, and SQL-based data analysis** on structured datasets.

PROJECTS

Metro Operations & Passenger Demand Analytics | Python, Pandas, NumPy, SQL, Matplotlib, Power BI

- Analyzed **92,280 hourly ridership records** across **83 Bengaluru Metro stations** over 48 observed days, covering **33.8M passenger movements**.
- Identified **Majestic** as the busiest station with **1.65M total ridership** and **34.4K average daily ridership**; the top 5 stations contributed **17.3%** of total network ridership.
- Identified **18:00** as a major peak hour, with Mahatma Gandhi Road recording **159.5K passengers**; weekday demand averaged **754K passengers/day**, about **29% higher** than weekends.
- Used **SQL and Python** to analyze station, hourly, daily, weekday/weekend, and time-period demand patterns to derive actionable passenger demand insights.
- Built an interactive Power BI dashboard to visualize station, hourly, daily, and weekday/weekend demand patterns.

E-Commerce Sales & Customer Revenue Analytics | Python, Pandas, NumPy, SQL, Power BI

- Analyzed e-commerce transaction data using **Python, Pandas, and SQL** to evaluate sales performance, customer behavior, and revenue trends.
- Performed **data cleaning, exploratory analysis, and customer segmentation** to identify high-value customers, product trends, and purchasing patterns.
- Developed an interactive **Power BI dashboard** to track sales, revenue, customer, and product KPIs and communicate actionable insights.

CERTIFICATIONS

- AlgoUniversity – DSA Mastery
- Be10x – AI Tools Workshop

ACHIEVEMENTS

- Solved 800+ coding problems across LeetCode, CodeChef, Codeforces, and GeeksforGeeks.
- Achieved Honours Award from College CSE department
